N. HOW THE CHRONIC BENEFIT WORKS

The Chronic Benefit includes cover for medication from a specified list of chronic conditions which is in accordance with the Scheme option. These conditions have been selected according to clinical and actuarial criteria.

Chronic Disease List - The Prescribed Minimum Benefit regulations require that medical schemes cover the diagnosis, medical management and medication for a specified list of 27 chronic conditions known as the Chronic Disease List. All such conditions meeting approval criteria will be authorised under the PMB Chronic Medication benefit.

Extended Chronic Disease List - RUMed provides cover for an Extended Disease list. All such conditions meeting approval criteria will be authorised under the Extended Chronic Medication benefit.

The PBM team will authorise an amount for all approved chronic conditions. The approved amount (Chronic Drug Amount - CDA) is determined based on the treatment protocols for all levels of treatment for each condition. The CDA is the maximum Rand amount that will be approved for the class/category of each drug that is authorised.
